Subject Index

A. spicatum 285
Abiotic factors 247
Acarina 319
Acetylen inhibition technique 219
Acetylene reduction assay (ARA) 356, 71, 75
Acid organic soil 172
– phosphatase 128
Actinomycetes 260
Active N 134
Aeration 231
Agropyron desertorum 285
Amino acids 25
Ammonia volatilization 227
Ammonium 189
– concentration 247
– excretion 373
– polyphosphate 325
Anabaena azollae 102
Anhydrobiosis 1
Antibiotic resistance 66
Arachis hypogaea 311
Arginine ammonification 349
Arylsulphatase activity 80
Autotrophic nitrifiers 255
Autotrophy 335
Available sulphate 80
Azolla microphylla 102
Azospirillum lipoferum 71
– spp. 356
Azotobacter sp. 71

Bacteria 1, 13, 178, 197, 373, 87
Beijerinckia sp. 71
Bioavailability 48
Biomass 172
– C 343
– N 343, 54
Bradyrhizobium 311
– *japonicum* 66
– spp. 75
Bulk density 191

Cadmium 48, 61
Cajanus cajan 75
Carbofuran 29
Carbon flux 7
Carbon mineralization 172
Casts 191
Cattle manure 303
Chloroform fumigation 271
– fumigation-incubation technique 172
Clipping 285
CO_2 evolution 197, 242, 260
Cocoon production 303
Collembola 255, 279, 319
Compaction 231
Competition 66
Composting 260
Coniferous forest soil 255
Conjugation 19
Corn production 307
– residues 328
Cryoboralf 134, 144
Cryoboroll 134, 144
"Crystobiosis" 1
Cultivation 343
Curing 75

Dehydrogenase activity 178
Denitrification 219
Derxia sp. 71
Detrital food web 29
Dimethoate 29
Dimethylsulfoxide reduction 349
Disease predisposition 166
Dry tropical forest 343

Earthworm 160, 279, 303
– burrows 191
– casts 178
Effective ecological dose (ED_{50}) 235
Eisenia fetida 160
Entisol 325
Estractable phosphorus 307
Etridiazole 204, 369
2-Ethynylpyridine 204
Eucalypt forest soils 212
Eucalyptus forests 154
– *regnans* 154
– sp. 319
Extraction 80

Farmyard manure 343
Filamentous fungi 260
Food web 1
Formalin extraction 160
Free living bacteria 71
Fumigation 38
Fungal hyphal length 87
Fungi 1, 178
Fusarium oxysporum 38
– *solani* 38

Gaeumannomyces 166, 97
Gas diffusion 231
Gene transfer 19
Gerbera jamesonii 38
Glomus aggregatum 111
– *fasciculatum* 285
Glomus lacteum 293
Glucose 154
Groundnut 311
Growth 303

Half-life 325
Hardwood barks 260
– site 160
Heavy metal toxicity 235
Heavy metals 87
Heterocyclic N compounds 204
High performance liquid chromatography 25
Hordeum vulgare L. 134
Humus fractions 54
Hydrogen consumption 231
Hydrolysis 325
Hydrolyzable N 54
Hydroquinone 227

Immobilization 212
Immobilized protease 25
Industrial pollution 61
Iron 97
Irrigation 219

Klebsiella pneumoniae 71

Labile organic phosphorus 212
Legume N 54
Leucaena leucocephala 111
Lime 335
Litter bags 319
Litter decomposition 87
Lodgepole pine forest 29
Logistic dose-effect curve 235
Lolium perenne 335
Lumbricus terrestris 160, 191, 279

Macropores 191
Maintenance energy 7
Maize-cowpea intercropping 183
Manganese uptake 293
Mechanistic model 7
Medicago sativa L. 61
Metal toxicity 61
Michaelis-Menten constant for ammonium oxidation 247
Microarthropods 144, 279, 319
Microbial activity 197
– activity determination 349
– biomass 134, 197, 271, 349, 7
– ecology 29
– P 212
– succession 260
– suppression 38
Microcosm 19
Microhabitats 279
Middens 279
Mineral fertilization 219
Mineral-fixed ammonium 298
Mineralizable N 271, 54
Mineralization 13
Mites 1
Mobilization 19
Moisture 285
Mycorrhizae 285
Mycorrhizal roots 128

^{15}N 134
– method 102
– technique 219

–, labelled material 54
–, N turnover 298
N and P enrichment 339
– cycling 102, 134
– mineralization 54
– P, K 178
N-(Diaminophosphinyl)-cyclohexylamine 227
N-(*n*-Butyl) phosphoric triamide 123
N-(*n*-Butyl) thiophosphoric triamide 123, 227
N_2 fixation 311
N_2O evolution 197
Naked amoebae 373
Nematodes 1, 144
Nicotiana rustica L. 48
– *tabacum L.* 48
Nitrapyrin 204, 369
Nitrate 189
– reductase 335
– reduction 197
Nitrification 204, 247, 335
– inhibitors 369
Nitrite accumulation 227
Nitrogen 13, 189
– deposition 255
– extraction 189
– fixation 356
– mineralization 189, 212, 373
– mobilization 255
– uptake 183
–, 15 183
No-till ecosystem 328
Nodulation 75
Non-exchangeable ammonium 298
Norway spruce 128
Nutrient availability 38
– cycling 271
– leaching 328
– uptake 339

Organic C 178
– matter fractions 25
– phosphates 128
– residues 219
Oxisol 325

P status 111
Paddy straw compost 339
Pectinolytic bacteria 260
Peptides 25
Perionyx excavatus 303
pH 260
Phenolic acids 116
Phenylphosphorodiamidate 123, 227
Phospate-extractable sulphate 80
Phosphatase 235
– activity 178, 328
Phosphate uptake 293
Phosphoryl triamide 290
Phylloplane 71
Phytohormones 356
Phytophthora cryptogea 38
Phytotoxicity 260, 48
Phytotoxin 328
Picea abies (L.) Karst. 128
Pigeonpea 75
Pinnule 111
Plant residues 116
Plant uptake 13
Plant-root association 356
Plasmid 75
Pollution 48, 87
Predation 13
Prostigmatid mites 279
Protozoa 13, 144, 373
Protozoans 1
Pseudobactin 97
Pseudomonads 260
Pseudomonas 166, 97
Pyrazoles 204
Pyridines 204
Pyrite 339
Pyrophosphatase 325

Rain forest 71
Rainfall 319
Red clover 293
Relative nutrient uptake 293
Residual fertilizer N 183
Respiration 231
Rhizobium fredii 66
– *meliloti* 61
– spp. 75
Rhizoctonia solani 38
Rhizosphere 128, 356
Risk assessment 19
Rock phosphate 339
Root rot 38

Seed germination 116, 369
– treatment 166
Seedling growth 116
Semiarid grasslands 29
Sewage sludge 160
Siderophore 97
Soil 13, 373
– aggregates 349
– biomass 343
– compaction 191
– fauna 29
– P 307
– particle-size fractions 298
– pollution 235
– profiles 197, 80
– respiration 144, 154, 242, 87, 95
– solarization 38
– solution ratio 80
– texture 298
– type 325
– water 242
Soils 189
Soybean nodulation 66
Sporeformers 260
Spruce plantation 160
Stagno Stagnohumic gley 335
Substrate-induced respiration 242, 95
Subsurface 197
Survival 19

Take-all 166
Temperate climate 219
Temperatur 260
Thiadiazoles 204
Thiophosphoryl triamide 290
Tomocerus minor 255
Translocation 48
Triazoles 204
Trifolium pratense 293
Triticum aestivum 339
Trophic structure 1
Tropical soils 111
Tussock grasses 285

Urea 123, 290
Urea hydrolysis 227
Urease 123, 290
Urease activity 178
Urease inhibitors 227

VAM 61
Vermicomposting 303
Vesicular-arbuscular mycorrhizae 293
– mycorrhizae 307
– mycorrhizae (VAM) 61, 311
V_{max} of nitrification 247

Water movement 191
Water potential 1
Water-soluble carbon 154
– sulphate 80
Wetland rice 102
Wheat 339

Yeasts 260

Zea mays 307
– *mays L.* 48
Zinc 61
